## ICE - XOS Thunder HD Integration

STATS Sports Solutions Group creates next generation sports information services and specialized solutions for front-office, coaching and scouting personnel. Using specialized data visualization, presentation, and interactive technologies -- STATS' ICE platform helps teams leverage their most important assets and make faster and better decisions.

The combination of XOS Thunder HD and the ICE platform elevates the value of STATS' proprietary X-Info and player tracking data by tagging the most detailed game events, mapping them to video and presenting data in an optimal and contextual manner.

ICE provides an organization significant value added benefits and features to the Thunder XOS HD platform.

The screenshot displays the ICE LITE web interface. At the top, there is a navigation bar with the ICE LITE logo, a search bar, and buttons for 'Sign Out', 'Boards', 'Evaluation', '0 T(s)', '0 P(s)', and 'Clear All'. Below this is a filter section with tabs for 'NFL Players', 'NFL Teams', 'College Players', 'College Teams', and 'By Stat'. There are also dropdown menus for 'Conference (All)', 'Division (All)', 'Team (All)', 'Offense', and 'Position (All)'. A search bar with the placeholder '[Search Last Name] - minimum 4 characters required' and 'Search' and 'Reset' buttons is present. The main content area is titled 'Board Results' and shows a grid of player cards. Each card includes the player's name, position, number, height, weight, team logo, and years as a pro.

## Game Planning

### Self-Scouting

Streamlined ability to self-scout tendencies, strengths and weaknesses, directly tied to video.

### Opponent Scouting

Instant breakdown and access to video cuts of split information and detailed X-Info for players and teams.

### Situational Breakdown

Highlight key situational scouting situations via ICE's intuitive interface: personnel groups, down, distance, score differential, yards gained, field location, time remaining and much more.

### ICE Newsstand

Leveraging our detailed X-Info and play-by-play data, the ICE Newsstand automates the report process by delivering valuable scouting information for self and opponent scouting identifying key tendencies to watch for in film study.

## Player Evaluation and Development

### Draft Evaluation

View video cuts for all players with a detailed statistical query of valuable information of more than 160 performance metrics for the entire organization to access and utilize.

### Player Rankings

Scouts and Player Personnel can rank players by performance metrics such as burned defender, yards after first contact, broken tackles, QB knockdown and hurries and drill down to video for each and every play, making the decision making process easier.

### Enhanced Player Teaching

By querying favorable and unfavorable outcomes via STATS X-Info, compile playlists to reinforce proper technique

### Objective Data Tied to Video

Customized reporting experience tying unique objective X-Info analysis directly to video.

## Operational Efficiency

### Efficient Process – Time Savings

Data cataloging and distribution is enhanced by STATS proprietary X-Info metadata tagged automatically to Thunder HD, creating a new level of analytical power and operational efficiency for teams.

### Information Dissemination

ICE is an information platform that improves the efficiency in which actionable intelligence is shared and understood throughout the organization.

### Digital Playlist Creation

With just one click coaches and video coordinators can package digital playlists and share them with appropriate personnel across the organization.

### Single-Source Data Warehouse

ICE acts as a single source system that aligns a team's entire knowledge base - everything from analytical data to player records to video to scouting information.
